

On 11/04/2015 Detective J. KELLY #55 (UC Berkeley police department) and I (J.CAIRES #67 UC Berkeley police department) were assigned to assist the UC Merced police department in the investigation of the officer involved shooting death of UC Merced student Faisal Mohammad.

Det J.KELLY and I responded to the UC Merced police department and met with LT. K. MCNIFF, Det. L.ROBERSTON (UC San Francisco police department) and LT. HER (UC Merced police department). LT. HER informed me that we were going to complete the Internal Affairs (IA) investigation into the officer involved shooting.

LT. HER showed me, Det. KELLY, LT. MCNIFF, and Det. ROBERSTON a walk-through of the crime scene (Stabbings) that occurred on the UC Merced campus. I noticed inside classroom [REDACTED] appeared to have blood stains on the wall and the classroom desks in a "Disarray" state.

We were then walked through the multiple stabbing victims locations that occurred outside of the building and walked towards the pedestrian bridge located on Scholars Lane where the officer involved shooting occurred. I saw a sheet/cover placed over Faisal Mohammad's body on the bridge. Close to the body I saw a single shell casing and a black knife.

See UC Merced report number #15-0249 and Merced County Sheriff report #15-38672 for a complete documentation of the crime scene.

LT. MCNIFF assigned me to be present during the autopsy of Faisal Mohammad that was going to occur the following day (11/6/2015) at 1300 hours. LT. MCNIFF assigned Det. J.KELLY to be present during the interview of the UC Merced officers involved in the shooting. See Det. J.KELLY's report for further regarding the interviewed statements of the UC Merced officers.

On 11/06/2015 at approximately 1245 hours, UC Merced police Detective Kari GOMES and I arrived at the Merced County coroner's office (455 East 13<sup>th</sup> Street Merced, Ca) for the autopsy of Faisal Mohammad. UC Merced police detective Kari GOMES was present for the UC Merced criminal investigation (#15-249) different from the internal affairs investigation I was present for. Also present was a Merced County sheriff deputy.

Merced County pathologist Dr. Super conducted the autopsy.

I witnessed Dr. Super remove Faisal Mohammad's clothing starting from his white socks and systematically working his way up to Mohammad's black ski mask covering his face. (Faisal Mohammad was not wearing shoes). Faisal Mohammad was still restrained by handcuffs and had white "Baggies" placed over both his hands.

While removing Faisal Mohammad's green coat Dr. Super located a folded white piece of paper inside of the coat pocket.

Dr. Super showed me the folder piece of paper. I documented what I was able to read (Allah vigilance!). The folded piece of paper had other writings on it and it appeared to be a "manifesto" for the crimes Faisal Mohammad carried out on the UC Merced campus.

Later during the autopsy I was provided a copy of Faisal Mohammad's "Manifesto" that was found inside the green coat he was wearing. Some things written of note were:

"Praise and remember Allaah. Vigilance!"

The manifesto mentions going to classroom [REDACTED] (The location of the first stabbing).

Also mentioned was:

"20. If the other draws his gun then charge him; kill him or achieve shahaadah fi sabillah mshaa Allaah"

"21. Otherwise take gun and jog to [REDACTED]"

The manifesto mentions Faisal Mohammad's desire to cut the head off of one of his victims. Read the Qur'an until the police arrive where then Mohammad would draw a gun and say "La ilaaha illaa Allah!" and engage the police.

\*Please see attachment for a copy of the "Manifesto" found on Faisal Mohammad's body.

I had a series of diagrams I was documenting while Dr. Super was performing the autopsy. I documented a superficial cut to the top of Faisal Mohammad's left hand.

Faisal Mohammad had what appeared to be a bullet entry wound into his left scrotum and an exit wound in his left buttocks.

Faisal Mohammad had a second gunshot entry wound to his upper left chest cavity area. There was no exit wound for that entry wound. Dr. Super removed a bullet from Mohammad's right "Hip" area.

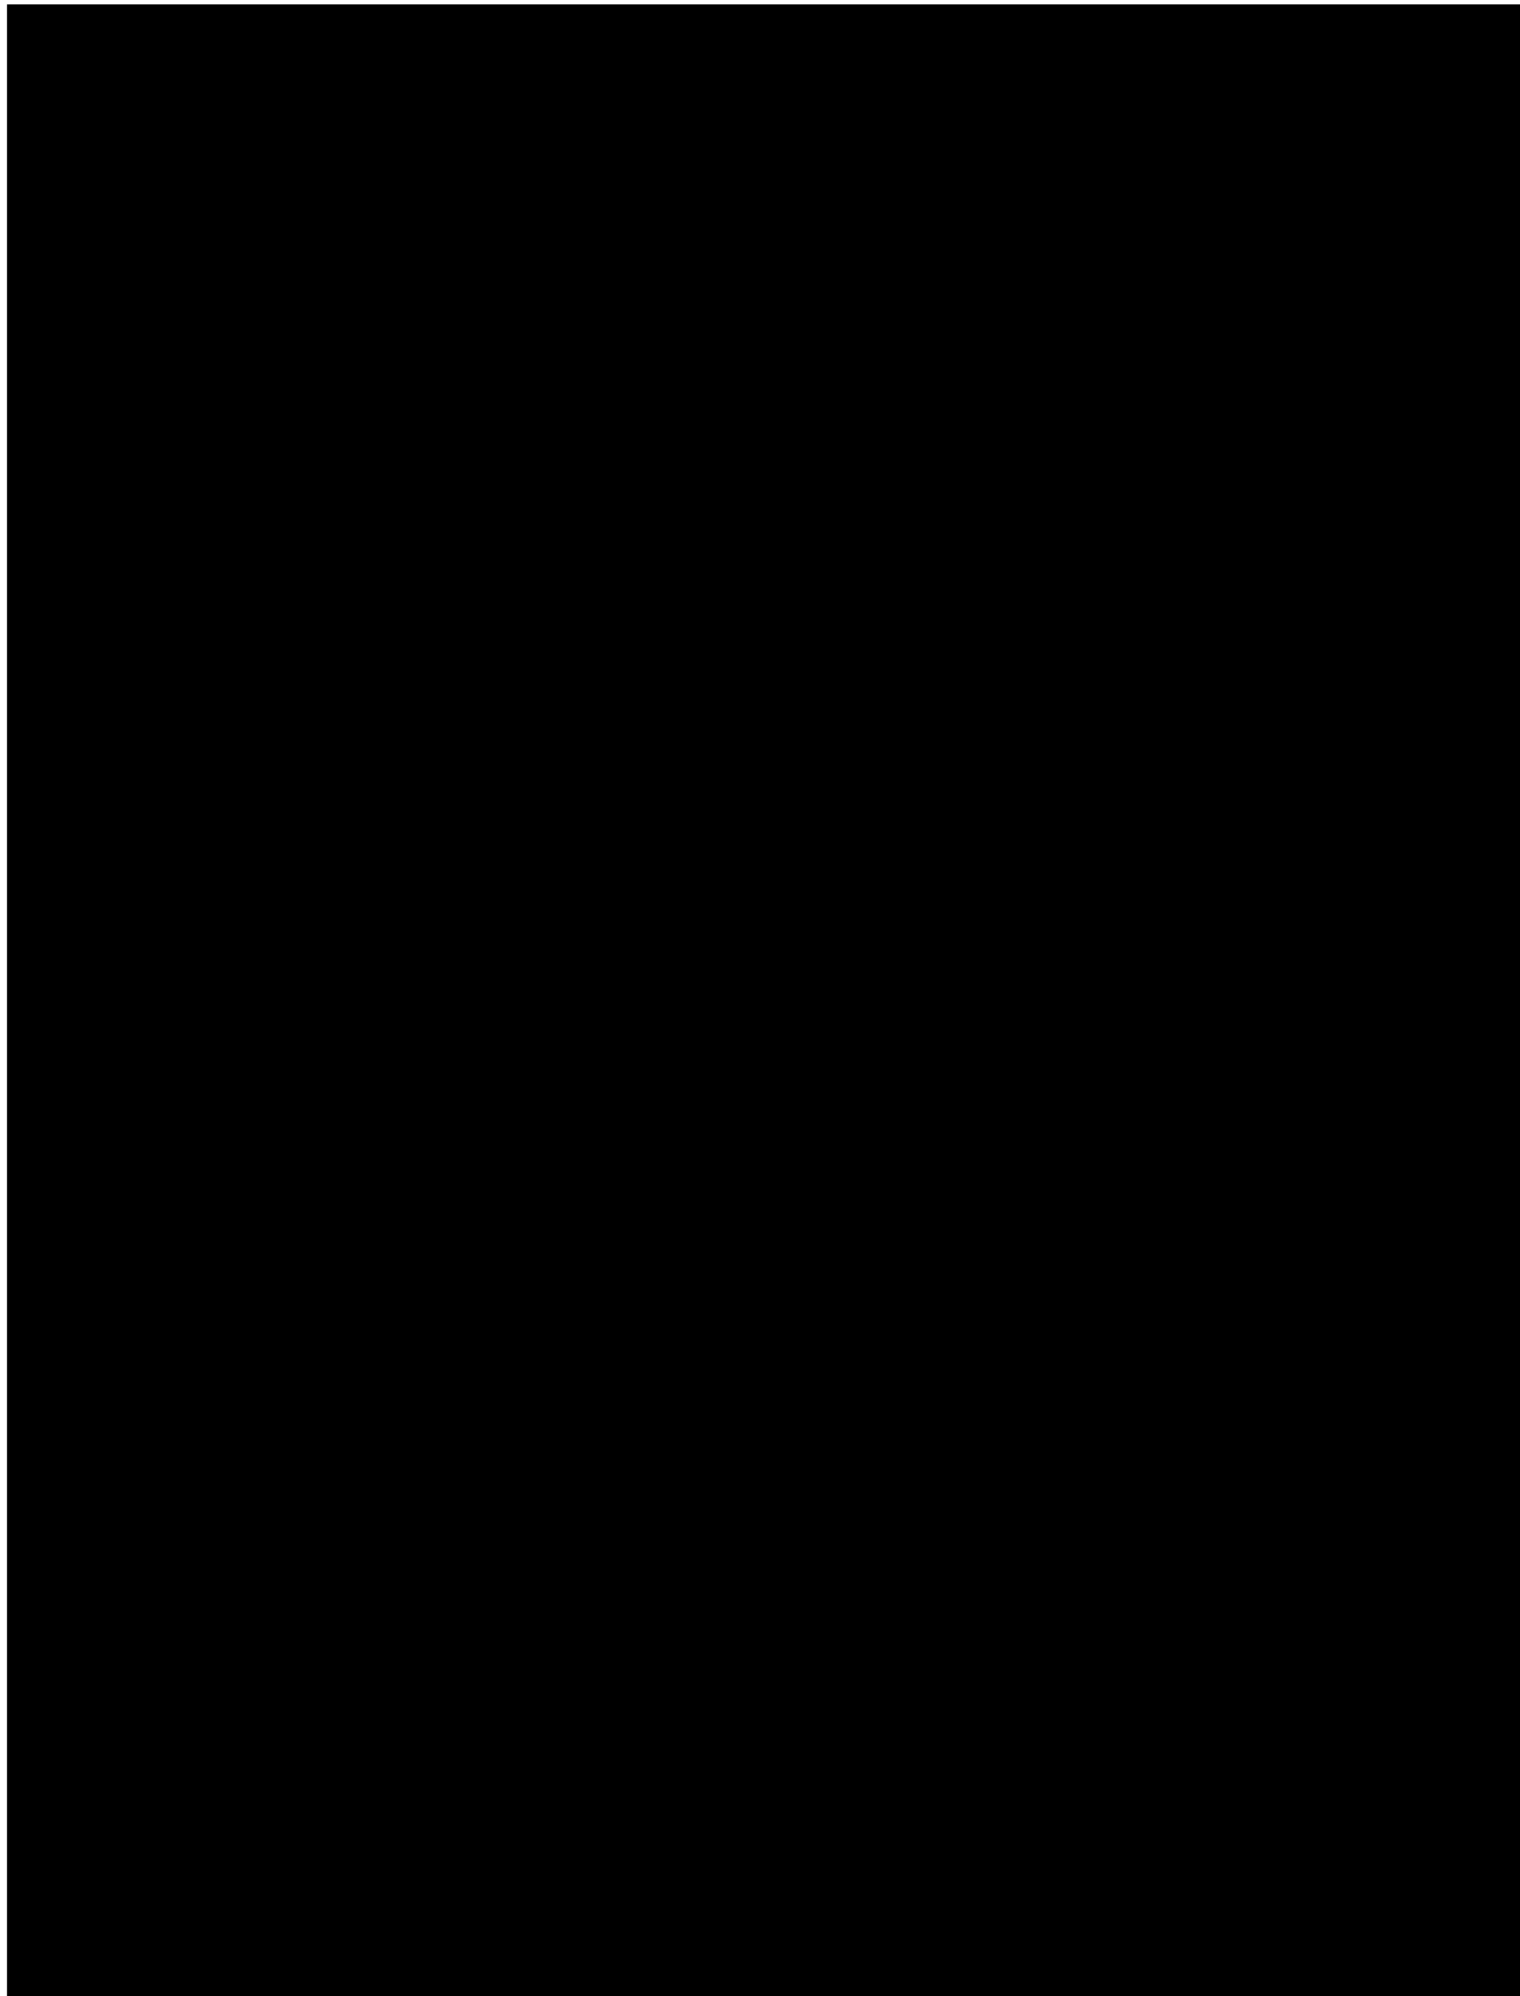

Dr. Super showed me the internal organs of Faisal Mohammad. I saw what appeared to be a consistent straight line between the entry wound to the upper left chest cavity and where the bullet was removed from Mohammad's body in the right hip area. I saw that most organs showed signs of being hit with a bullet including Mohammad's spine bone.

I saw no other gunshot entry/exit wounds on Mohammad's body or any kind of blunt force trauma on the body.

See Dr. Super's report for further regarding the autopsy of Faisal Mohammad.

\*Please see attachment for diagrams of the autopsy.

Nothing further.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The next section describes the methodology used in the study, including the data sources and the statistical techniques employed. The results of the study are then presented, followed by a discussion of the findings and their implications. The paper concludes with a summary of the main points and suggestions for further research.

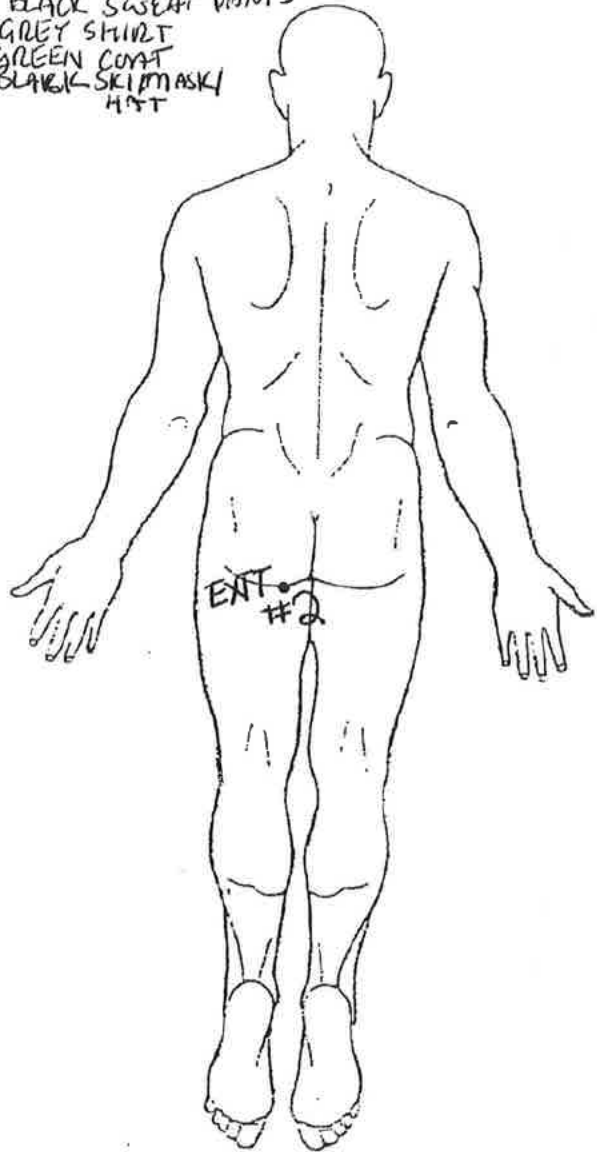

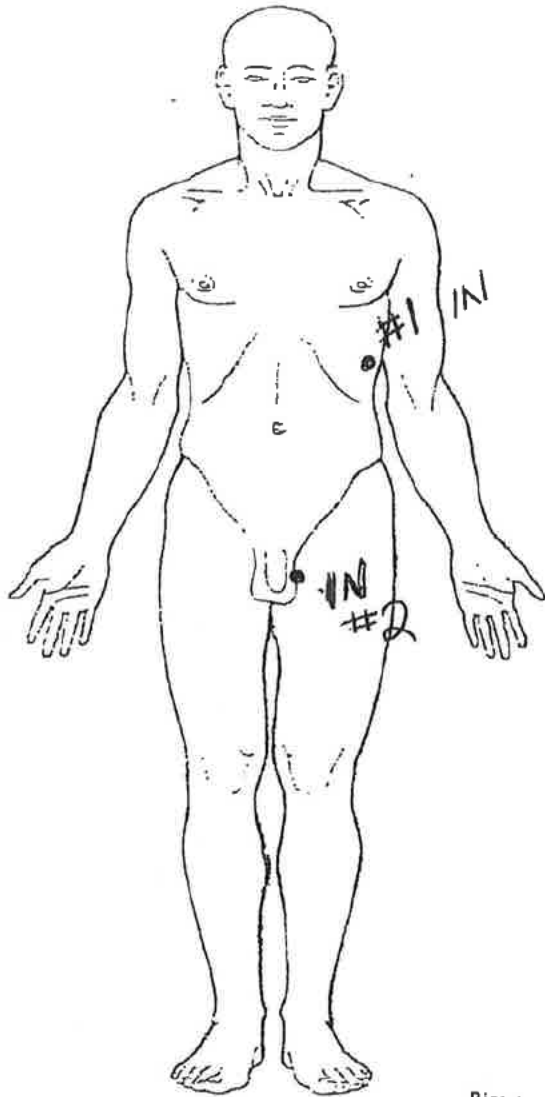

The research was conducted using a quantitative approach, with data collected from a large sample of participants. The results show a significant positive correlation between the variables studied, indicating that the hypothesis was supported. The findings have important implications for the field and suggest that further research is needed to explore the underlying mechanisms.

In conclusion, the study provides valuable insights into the relationship between the variables and highlights the need for continued research in this area. The results are consistent with previous findings and offer new perspectives on the topic.
